Mr. Marty Perrone
Certified TEGG Representative
Carpenter Electric, Inc.
1333 53rd Street
West Palm Beach, FL 33407

Dear Marty,

Now that your TEGG certified electricians have finished testing the electrical equipment within our PVC manufacturing plant, I must say... I am extremely impressed!

Your unique three-step testing process was extremely thorough. Your TEGG trained electricians were very professional and knowledgeable throughout the entire process. We are now fully confident that your extensive testing methods will ensure the safety of our employees against electrical fires and prevent accidental shut-downs due to potential component failure. But most of all, we appreciate the fact that our critical electrical components are guaranteed against failure for the next twelve (12) months.

For the reasons stated above, I highly recommend your comprehensive electrical component testing service to anyone who takes pride in making sure their facility never experiences an unplanned electrical power outage and does everything possible to ensure the safety of their employees.

Yours Truly,
